Thoughts Please consider the Alaska Marine Hwy System as the most convenient,efficient,reliable, safe,& affordable type of transportation. It has been a all weather, year round system for these many years. The State needs a proven & dependable transport system. The cost of a road increases as the debate continues & there are many uncertainties for a year round route. I don't feel the road would meet the criteria that has been established. Thank you, Mark S. Kistler Haines, AK
